

DETONATION
AND FLAME
ARRESTORS

**CLEAN BURNER
ASSEMBLIES**

FAV SYSTEMS INC. WILL DESIGN A UNIT TO MEET YOUR SPECIFIC REQUIREMENTS

FAV Systems Inc. now offers the Clean Burn Assembly, a user friendly, Burner-Flame Arrestor Combination.

These burner assemblies are designed to be light weight, compact, user friendly and economical. Best of all, these assemblies have been tested to prevent flame propagation from inside the fire tube to outside

These assemblies can be equipped with a variety of air/fuel mixers and burn nozzles. Sizes from 6" to 20" fire tubes can be supplied. BTU input is suited to your fire tube configuration. These units can be single, dual or triple mounted.

For your heating and safety needs, please call FAV Systems today. We will be please to assist you in selecting the right product.
