

DETONATION  
AND FLAME  
ARRESTORS

## END OF LINE DETONATION AND STANDARD FLAME ARRESTOR

# FAV SYSTEMS OFFERS A CHOICE FOR EVERY CONFIGURATION

The FAV Systems Inc. End of Line Detonation and Standard Flame Arrestors group can be arranged in many different configurations. We can configure these units using USCG accepted Detonation Flame arrestors, CSA witnessed Detonation Flame arrestors, Deflagration Flame arrestors or high grade flame arrestors. Shown here are a few of the different configurations from which to choose.

Discharge

FAV Systems Inc. can assemble a variety of products upon your request. These sizes range from 2" to 12", and come in CS, 304 S.S., 316 S.S., Hastaloy, etc. These units have USCG acceptance and CSA verification of performance. These approvals assure that your products will be protected from fire and explosion. Flow curves and gas classifications are available upon request.
