

VAPOR TIGHT VENT MODEL G.H. GAUGE HATCH

QUICK ACCESS GAUGE HATCH

Function

The FAV Systems Model GHFL and GHFF Gauge Hatches are designed with the ease of obtaining product samples from storage tanks in mind. The Model GHFF is designed to provide quick access to the storage tank as well as emergency relief venting. Model GHFL has a lock down feature, which assures 100% sealing up to 15 PSIG.

Special Features

The Model GHF is constructed with a foot treadle to allow hands free tank sampling. Once your foot is removed from the treadle the hatch will fall back into place using only gravity. Gauge hatches use FAV Systems patented Counter-force Pressure Suspended Pallets. Includes 316 Stainless steel pallet and seat.

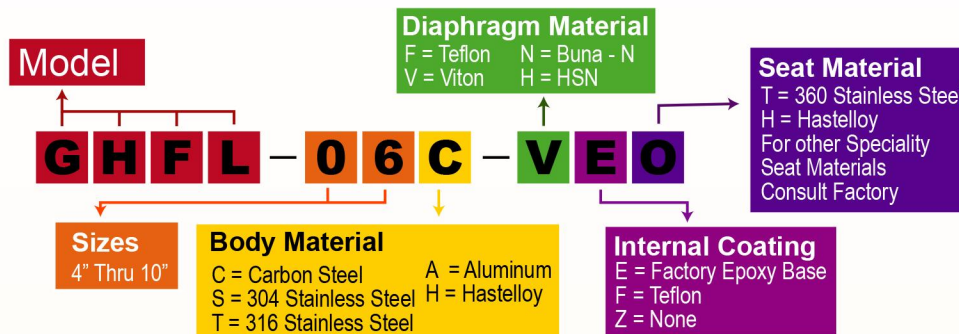

Performance and Quality

We stand by quality and reliability in our products. That is why our gauge hatches are all factory checked for leaks. With your gauge hatch you will receive a certification sheet showing the hatch does not leak. This sheet shows our commitment to quality and performance. We don't just claim to be the best, we prove it everyday. Call us for a taste of tomorrow's technology...today.

- * Sizes 4" through 10" A.N.S.I. are STANDARD
- * Optional D.I.N., B.S., J.I.S., or National Pipe Thread connections are special order
- * Available in carbon steel and stainless steel
