

VAPOR TIGHT
PRESSURE VACUUM THIEFT HATCHES

COUNTER FORCE PRESSURE SUSPENDED SEAL ASSEMBLY

**FAV SYSTEMS
PATENTED SEALING
SYSTEM WITH TANK
PRESSURE GAUGE
FEATURE**

FAV Systems has developed the Vapor Tight Pressure/Vacuum Thief Hatch to address fugitive emissions releases for the new millennium. Releases of toxic vapors into the atmosphere are being viewed as unacceptable and wrong. The right thing to do is to purchase equipment that offers superior sealing ability; products that are built to last as long as the tank itself, and that have good local service and support to make repairs quickly if necessary.

The FAV Systems Vapor Tight Thief Hatch addresses all of these issues. The Counter Force Pressure Suspended Seal Assembly actually inflates as the pressure rises in the tank. As it inflates, it creates an even tighter seal. A choice of body materials such as aluminum, coated carbon steel and stainless steel is available to choose from. Carbon steel and stainless steel construction ensures long life and durability. FAV Systems has local manufacturing facilities and pursues engineering challenges aimed squarely at our harsh climate and conditions.

Don't throw your money away by buying low quality cast aluminum band-aid products offered by other manufacturers. Go with quality and choose FAV Systems Inc. Vapor Tight Pressure/Vacuum Thief Hatch assemblies.

Optional Pressure Only Configurations Also Available

SPECIALIZED IN PREVENTING FUGITIVE EMISSIONS

VAPOR TIGHT
PRESSURE VACUUM THIEF HATCHES

THE COUNTER FORCE PRESSURE SUSPENDED SYSTEM... A CLEAR VIEW OF FAV SYSTEMS INNOVATION IS REPLACING TO COMPETITION

- * Housings available in Carbon Steel, Stainless Steel or Aluminum
- * Pallets available in Stainless Steel or Aluminum
- * Diaphragms available in Teflon or Viton

**ALL THIEF HATCHES ARE NOT CREATED EQUAL...
NOT AFTER YOU'VE TRIED FAV SYSTEMS TECHNOLOGY!**

With unmatched sealing ability and set point reliability, FAV Systems Pressure / Vacuum Thief Hatches represent the future of Thief Hatches!
