

TANK SEPARATION COMBO 12 IN 1

SOLVING YOUR WELL SITE SEPARATION & STORAGE NEEDS

FAV Systems Inc. Designs and manufactures many products used in the production of oil and gas. Recently, a FAV Systems customer asked if we could design a well site separation and storage unit that would be safe, simple and economical. Our design team, using existing in-house technology, assembled the 12-In-1 Tank & Separation Combo. This unit exceeds well site regulations and is far superior to any other package of it's kind.

- * Single Skid Load
 - Features longer stable foot print (no planking required) with 112 sq. ft. of surface area
- * Dual Contained and Heated Storage
 - Comes with steel primary tank (coating optional) or corrosion proof internal plastic liner
- * Unique Under Floor Heating (Patent Pending)
- * Anti-Siphon Load Lines
 - Safety feature eliminates fitting and valve leaks
- * High Dump
 - Freeze proof water dump line
- * Easy-to-Read Liquid Level Gauge
 - Comes with stainless steel cable, rigid guide rod
- * Cyclonic Tower Separators
 - High efficiency cyclone separators are registered as pressure fittings
 - Not required to be tracked as pressure vessels
- * Easy-to-Clean Filter System
- * Dry Flow Recorder
 - Choice of orifice changers to meet your budget
- * Emergency Shut Downs
 - Optional
- * Liqui-Fire Heat Tape System
 - Optional system can also wrap well head and flow lines to prevent freezing
 - Reduces downtime and added expenses
- * Differential Pressure Methanol Injectors
 - Can introduce any volume of methanol to prevent flow line freezing
 - All vented gas utilized by catalytic heater means no wasted energy

COMBINATION PACKAGE FEATURES

- * 100 bbl Capacity Storage Tank
- * Separation Package
- * Methanol Injection
- * Liqui-Fire Heating System
- * Contained on Single Skid

**COMBINE THESE 12 FEATURES AND YOU'LL SEE WHY
WE CALL IT THE 12-IN-1 TANK-SEPARATOR COMBO**

SPECIALIZED IN PREVENTING FUGITIVE EMISSIONS
